

To whom it may concern.

I have been working with Irwin Lambersky for almost 11 years in regards to Miranda's varied solution needs and supply issues.

The service we have received is quick and efficient. He is actively working with our design team on better solutions and improved deliveries. He has also helped to find cost reduced equivalents and alternatives to EMI solutions on several of our products.

He has always provided us with excellent customer service and we can always count on him - especially in a panic - he always delivers.

Regards
